A NEW CONCEPT FOR STRUCTURAL REPAIR AND  
MEASUREMENT OF DAMAGED VEHICLES

CAMELEON

Customizable fixture solution - Universal | Adjustable

REF NO: CAM01.102 | CAM02.142 | CAM02.162

A New concept for structural repair and measurement of damaged vehicles. Cameleon offers a complete and accurate structural repair solution for all the existing and future vehicles without the need for additional tools.

- ▶ **Online 3D software** ensures UP-TO-DATE vehicle database all the time
- ▶ Intuitive assembly layout facilitates quick construction of Cameleon fixtures
- ▶ No compromise in the accuracy level of repair
- ▶ Complete solution for measuring/diagnosis, anchoring, re-construction and repair with a unique technique for all the vehicles in the segment
- ▶ Facilitates the use of existing Celette benches, cross members, MZ towers and MZ+ pistons
- ▶ User-friendly software interface enables faster learning by body technicians
- ▶ Twice as efficient in terms of productivity compared to electronic measuring systems and so-called universal jig systems
